

Backend Partner Program

Senior backend and platform reserved for your project.

Use the same monthly capacity for strategy, design, implementation, testing, launch preparation, or service improvement depending on what the project needs now.

Flexible Capacity & Scope:

150h or 75h per month standard,
Actual usage invoicing,
Scope can change monthly based on project needs.

Backend Is No Longer One Developer's Job

**One backend hire fills one role.
Backend risk spans many disciplines.**

Modern backend work is no longer limited to API implementation. Reliable launch and operation depend on many disciplines working together as one system.

Architecture

API / Server

Database

Networking

Cloud Infra

DevOps

Testing

Monitoring

Security

Performance

Operations

Hiring takes time. Technical risk does not wait.

Small decisions in architecture, data, deployment, and operations can become expensive business risks later.

What the Partner Program Provides

Flexible senior technical capacity for backend, platform, and live-service work.

Advisory & Review

Technical advisory, architecture review, code/design review, roadmap support, and technical risk analysis.

Architecture

Review

Risk

Build & Integration

Backend/API implementation, database work, infrastructure setup, service integration, dashboards, and documentation.

Backend

Database

Tools

Launch Readiness

Testing support, deployment flow review, observability setup, incident planning, and pre-launch stabilization.

Testing

Observability

Release

Live Support & Improvement

Live issue analysis, performance tuning, monitoring improvement, operational automation, and service improvement backlog.

Performance

Operations

Support

Use the same monthly capacity for strategy, design, implementation, testing, launch preparation, or service improvement depending on what the project needs now.

Monthly Capacity & Flexible Use

Reserve senior capacity. Use it where your project needs it most.

150h

standard reserved capacity
per person / month

75h

minimum adjustable capacity
per person / month

Notify by the 15th

Client may request reduced usage for the following month before the 15th day of the current month.

Actual usage invoicing

Unused hours do not roll over. Billing is based on agreed scope and actual usage.

Prior approval for extra work

Work beyond agreed capacity requires mutual approval on scope, hours, schedule, and cost.

Monthly scope can change

Use capacity for advisory, build, launch, live support, documentation, or troubleshooting.

Your monthly scope can change as your project changes.

Hiring vs Backend Partner Program

A single hire gives you one role. A partner program gives you flexible technical coverage.

Hiring One Developer

-  Longer hiring cycle
 -  One skill profile
 -  Fixed cost and onboarding risk
 -  Key-person dependency
 -  Difficult to change role by phase
 -  Limited coverage across design, launch, and operation
- 

CosmoUniverse Backend Partner Program

-  Faster start after agreement
 -  Multi-discipline senior expertise
 -  Adjustable monthly capacity
 -  Team-based support and handover
 -  Monthly scope adjustment
 -  Full design-to-live map- support
- 

Hiring fills a position. The program reduces backend and platform risk across the service lifecycle.

Operating Rules & SLA

Clear rules for predictable collaboration.

MINIMUM CONTRACT

1 month

Longer partnerships may receive preferential terms.

STANDARD HOURS

09:00–18:00

Business days unless otherwise agreed.

GENERAL RESPONSE

1 business day

For normal inquiries and coordination.

EMERGENCY SUPPORT

Optional add-on

Outside standard hours by separate agreement.

EXTRA WORK

Extra approval

Scope, hours, schedule, and cost are agreed before work proceeds.

EXCLUDED BY DEFAULT

Separate terms

24/7 NOC, legal liability for security breaches, third-party outages, and client infrastructure access/permission issues.

Issues caused by CosmoUniverse's own implementation error will be handled responsibly by CosmoUniverse.

Why CosmoUniverse

30+

years of senior experience

8M+

peak CCU experience

800M+

players reached

- Senior execution across backend, multiplayer, infrastructure, tools, and live-service operations.
- Experience from design and implementation to launch preparation, live operation, and improvement.
- Applicable to games, IT systems, software platforms, apps, backend-heavy products, and internal tools.
- Built for real service environments, not isolated development tasks only.

Senior execution, practical architecture, and long-term service thinking.

Start With a Technical Consultation

Start small. Scale when needed.

- 1 Discuss your product, team, risks, and roadmap
- 2 Define monthly capacity and support scope
- 3 Start with advisory, implementation, launch readiness, or live support
- 4 Review and adjust scope monthly or as needed
- 5 Expand only after mutual agreement

Minimum 1-month contract. Pricing after consultation.

Let's discuss your backend, infrastructure, platform, or live-service roadmap.
